

Accounting System Design Case Study

Beaches Air & Electrical turned to Enspira for help with financial management when they were looking to understand how to track company finances and needed a guide to great decision making. This new knowledge and understanding significantly benefited their business and provided them with the flexibility and confidence they desired, allowing them to focus on doing what they do best.

When did you start working with Enspira?

“We started working with Enspira when we made the transition from sole trader to a company. Glenn and Pete provided us with the right tools and information by setting up our Xero and Receipt Bank and taught us how to keep track of things. They spent many hours, and were often up late at night teaching us all that we needed to know and how to fix our mistakes. With all their knowledge, we really got it.”

How did Enspira add value?

“The knowledge we got from understanding how to run the business has really empowered us. We feel 100 times more confident. I didn't need to attend a bookkeeping course and I didn't need a bookkeeper which really freed up our time and provided us with great flexibility. Not only have they taught us how to grow, but they've covered us and made us feel protected, told us what to look out for and helped with making good decisions.”

Would you recommend Enspira?

“Enspira are a very dedicated team. We're so happy with the service that we've received and constantly sing praise to our family and friends. We'll always recommend Enspira. Our only regret is not starting earlier!”
