

## Enspira Virtual Management Accounting Case Study

EPM Projects Pty Ltd deliver premium project management and construction projects for blue chip clients. A consultancy business that stands for excellent outcomes requires quality support in terms of financial management and administration.

“Our industry requires us to be very finely tuned to financial performance,” says CEO Andrew Graham.

### How long have you been working with Enspira?

“We’ve been working with Enspira Financial (formerly Jaques Stanmore Financial Group) for over 17 years.”

### What does Enspira Financial do for EPM Projects?

“Enspira manage our bookkeeping, BAS, management accounting and statutory reporting. They give sound tax accounting advice.”

### What is the benefit of outsourcing these services?

“We get good customer service from Enspira. We have tried to do this work internally and tried other external providers, but neither of these options worked. Our business needs are sometimes demanding and we need an intensive level of attendance.”

### Do you receive good value from Enspira?

“There is a good balance between the service that Enspira has priced and our expectations. Cost and historical data are captured in an efficient and effective way. The next stage might be to integrate our predictive forecasting system with the accounting system.”

### What brought you to work with Enspira all those years ago?

“We were referred to Enspira by a friend who is also a client. There is a long history of trust and respect between the Enspira CEO and me.”
